**"The 5-Year Wilkinson Microwave Anisotropy Probe (WMAP) Observations:
Cosmological Interpretation"**

We have announced the results from 5 years of observations of the Wilkinson Microwave Anisotropy Probe (WMAP) on March 5. In this talk I will give the cosmological interpretation of the WMAP 5-year data, and discuss implications for dark matter, dark energy, neutrinos, cosmic reionization, and inflation.

Monday May 12, 2008

4:10PM – Room 55 Roessler
