

Physics 252B, Fall 2005 -- Instructions for authors:

The proceedings will be published in 8.5x11 inch format printed version of AIP Proceedings. While AIP generally needs a hard copy of the final manuscript, electronic submission of the final papers is strongly encouraged, particularly since this results in a much higher quality for the final proceedings volume. We can accept electronic files in either PDF or PS formats from LaTeX documents.

Proceedings generated from MS Word files are discouraged, but allowable by special permission from the conference organizer, Prof. Erbacher.

Each paper must be submitted together with a signed Transfer of Copyright form http://proceedings.aip.org/proceedings/tca_blank.pdf While it is often necessary to obtain permissions <http://proceedings.aip.org/proceedings/permission.pdf> for material taken from other sources, for the purposes of this meeting this will not be necessary.

Papers in electronic format (max. 6 pages, including figures and references) have to be sent to erbacher@physics.ucdavis.edu not later than 14 December 2005. The instruction booklet for authors as well as LaTeX classes are available on the AIP website at <http://proceedings.aip.org/proceedings/6x9.jsp>.

They can be downloaded and will aid the authors in the preparation of their papers in uniform format. Please be sure to download all templates and instructions for the format you selected, which is the 8.5x11 inch format.

Editors: R. Erbacher, M. Chertok, J. Conway, D. Lander, D. Pellet, M. Tripathi
