

Phys 10 Homework 8 (Due Thurs Mar 6)

Assigned: Feb 26

This homework is shorter than the others to allow time for you to study for the midterm. This homework will carry $\frac{1}{2}$ the weight of a normal homework in determining your total homework score.

8.1 Chapter 22 Problems 2 (*On page 681*).

8.2 Chapter 22 Problems 3 (*On page 681*).

8.3 Chapter 22 Problems 6 (*On page 681*).

Hint: around 1-3 sentences should be plenty to answer problems 6.1-6.3. I don't need extensive answers here, but they should be on target. You can get background information for these from reading chapter 22.
