Faculty Position  
In Experimental Particle Physics  

Department of Physics  
University of California, Davis  

The Department of Physics at the University of California at Davis invites applications for a junior faculty position in experimental particle physics. This position, targeted for high energy collider physics, has an anticipated start date of July 1, 2011. The appointment will be at the tenure-track Assistant Professor level.

The UC Davis experimental particle collider physics group, presently with five faculty members and two active emeriti, has strong involvement in the Tevatron and LHC collider programs, in the CDF and CMS experiments respectively. The UC Davis group seeks to strengthen its physics analysis and detector efforts on the CMS experiment as this exciting era of discovery begins. We seek candidates with outstanding research records, strong leadership abilities, and clear potential for impact in the field of collider physics.

Applicants must have a Ph.D. in physics and the ability to teach effectively at the undergraduate and graduate levels. Demonstrated success in an active research program in experimental high energy physics is essential.

This position is open until filled. To assure full consideration, please submit applications, including CV, statement of research plans and teaching interests, and contact information for three references, no later than November 15, 2010. Applications may be submitted online at http://apply.physics.ucdavis.edu.

Inquiries may be addressed to High Energy Experimental Committee Chair, Department of Physics, University of California, Davis, CA 95616, or e-mail heesearch@physics.ucdavis.edu.

Further information about the department may be found on our website at http://www.physics.ucdavis.edu.

UC Davis is an affirmative action/equal employment opportunity employer and is dedicated to recruiting a diverse faculty community. We welcome all qualified applicants to apply, including women, minorities, individuals with disabilities, and veterans.
