

Theoretical Cosmology Postdoc at UC Davis

We invite applications for one or more postdoctoral research positions in theoretical cosmology beginning in the Fall 2010, to work with A. Albrecht and N. Kaloper. Our research interests include theoretical cosmology, astroparticle physics, and model building with applications such as early universe theory, inflation, quantum cosmology, braneworlds, dark energy, dark matter, and other applications of fundamental physics to the universe. Our close ties with other members of the UCD Cosmology group, in particular with L. Knox, and with the UCD High Energy Theory group present an exciting intellectual environment with broad opportunities for interaction and collaboration for our postdocs.

For more information see

http://www.physics.ucdavis.edu/Cosmology/Cosmology_Group.html

<http://particle.physics.ucdavis.edu/hefti/index.php>

The appointment will be for two years, with a possible renewal for the third year, contingent upon performance and availability of funds. Applicants should send a CV, statement of research interests and publication list, and arrange for at least three letters of recommendation to be sent, either through <http://academicjobsonline.org/>

or directly to

Mr. Bill Tuck
(for Theoretical Cosmology Search)
Department of Physics
University of California
One Shields Avenue
Davis, CA 95616
USA

To ensure full consideration, completed applications should be received by January 4, 2010.

The University of California, Davis, is an affirmative action/equal opportunity employer with a strong institutional commitment to the achievement of diversity among its faculty and staff.
